

Dear readers,

the GESIS Survey Guidelines are short, concise texts for the profession on the most important contents when conducting surveys and working with survey data. The authors are GESIS staff members. The GESIS Survey Guidelines consist of contributions in four categories; Survey Instruments, Survey Statistics, Survey Operations, and Open Science.

In 2021, the following guidelines were published:

- Stadtmüller, Sven, Beuthner, Christoph, & Silber, Henning (2021). Mixed-Mode Surveys. Mannheim, GESIS - Leibniz Institute for the Social Sciences (GESIS- Survey Guidelines). doi: 10.15465/gesis-sg_en_038
- Beuthner, Christoph, Johannes Breuer, and Jünger, Stefan (2021). Data Linking - Linking survey data with geospatial, social media, and sensor data. Mannheim, GESIS - Leibniz Institute for the Social Sciences (GESIS Survey Guidelines). DOI: 10.15465/gesis-sg_en_039
- Schröder, Jette, & Zabal, Anouk (2021). Documentation of Face-to-Face Surveys. Mannheim, GESIS - Leibniz Institute for the Social Sciences (GESIS - Survey Guidelines). DOI: 10.15465/gesis-sg_en_041

We would also like to thank our reviewers :

- Elizabeth Lea Bishop
- Achim Koch
- Silke Martin
- Ines Schaurer
- Jette Schröder
- Pascal Siegers

If you have any questions or comments regarding the GESIS Survey Guidelines, please contact us at the following e-mail address: surveyguidelines@gesis.org.

Best regards from the editorial team of the GESUS Survey Guidelines,

Henning Silber, Jessica Daikeler, Barbara Felderer und Cornelia Neuert
